SUMMARY

Second-year Electrical and Electronics Engineering student with a strong foundation in electronic circuits and C programming. Interested in embedded systems and core electronics, with a focus on applying theoretical knowledge through hands-on projects. Quick learner with problem-solving abilities, seeking opportunities to gain practical experience and build technical expertise.

WORK EXPERIENCE

Technical Intern – MATLAB and its Applications

NIST University

- Built MATLAB simulations for engineering problems.

PROJECTS

Smart Pill Box – Web-Based Medicine Reminder System

- Built a secure web app using Firebase Authentication and Cloud Firestore for personalized medicine tracking
- Implemented exact-time reminder alerts and dynamic medicine management
- Enabled real-time cloud synchronization with a responsive, user-friendly interface

AI-Enabled Smart Black Box with V2V Communication

- Developed an AI-based system to monitor vehicle data, detect risky driving, and improve road safety.
- Enabled real-time V2V alerts and cloud-based data storage with OBD-II/CAN compatibility.

NeuroGuard – AI Healthcare Web Platform

- Integrated smartwatch sensor data (PPG) for continuous heart rate tracking
- Applied AI models to identify irregular patterns and trigger alerts

EDUCATION

2024 - 2028	NIST UNIVERSITY	(Avg CGPA: 9.23)
2022 - 2024	SANKALP SENIOR SECONDARY SCHOOL	(Percent: 81.2)
2010 - 2022	DAV PUBLIC SCHOOL	(Percent: 95)

SKILLS

Hardware & Languages Python, Java, C/C++, Verilog, System Verilog, IoT, MQTT, Arduino/ESP32
